---

I am a Full Stack developer with previous studies in modern languages, having completed 5 semesters of study. This experience has been crucial in developing my communication skills and my ability to quickly adapt to new concepts. My primary focus has been on Front-end development, although I have also gained a strong command of agile methodologies, GIT for version control and collaboration, as well as data structures and algorithms to create efficient and scalable solutions.

My career spans both Front End and Back End development, which has led me to work with various technologies such as JavaScript, React, Next.js, Node.js, Express, CSS, and Tailwind. I have a C1 level of English proficiency, allowing me to communicate fluently in professional and technical environments.

I am highly collaborative, which enables me to work in teams and adapt to different roles. My ability to approach problems creatively and my problem-solving orientation allow me to overcome technical challenges and deliver innovative solutions. Additionally, my passion for continuous learning drives me to stay updated on the latest technology trends and constantly improve my skills as a developer.

## PROJECTS

### **Full Stack Web Developer - GameStack**

jun. 25 - jul. 7

Academic Experience - Henry Bootcamp

During my academic experience at Henry Bootcamp, I developed a Single Page Application that connects to a video game API, enabling users to perform searches, apply filters, and sort the results. Furthermore, users have the capability to create new games through the interface provided by the application.

Front: React, Redux y CSS.

Back: Node y Express.

Data Base: PostgreSQL y Sequelize.

## **Full Stack Web Developer - Deal Up!**

Academic Experience - Henry Bootcamp

jul. 10 - agos. 18

As part of my academic experience at Henry Bootcamp, my team and I developed a platform aimed at creating a strong connection between entrepreneurs seeking financial resources for their projects and individuals looking to invest their capital.

Front: Next.js, Redux toolkit and Tailwind CSS.

Back: Node y Express.

Data Base: PostgreSQL y Sequelize.

## **PROFESSIONAL EXPERIENCE**

*Self-employed*

*July 2023 - August 2023 (2 months)*

*Argentina (Remote)*

- I collaborated on the development of "Deal Up!", a project aimed at establishing a strong connection between entrepreneurs seeking financing and individuals interested in investing capital.
- I utilized skills in technologies such as Next.js, Redux Toolkit, PostgreSQL, Tailwind CSS, JavaScript, and Express.js to implement various functionalities of the project.
- I worked closely with the team to create an effective platform that allowed entrepreneurs to access financial resources and investors to find investment opportunities.

## **TECHNOLOGIES**

**Programming Languages:** JavaScript (ES6+)

**Frameworks and Libraries:** React, Redux, Next.js, Redux Toolkit, Tailwind CSS, Express.js

**Database:** PostgreSQL with Sequelize

**Development Environment:** Node.js

**Tools:** Git, Jira, Confluence, Slack

**Agile Methodology:** Scrum

## **PROFESSIONAL EDUCATION**

- Full Stack Web Developer - Henry Bootcamp. 700 hours of theoretical and practical coursework. 2023.
- Bachelor's Degree in Modern Languages - 5 semesters. 2020-2022.

## **Languages**

- English C1 - Advanced
